ABOUT ME

UC Irvine Computer Science student and full-stack developer at the intersection of AI, blockchain, and entrepreneurship. Focused on building scalable, user-first applications that push technology forward and turn ambitious ideas into reality. Designed projects and launched products from multiplayer games to AI-driven platforms and decentralized marketplaces. Visit portfolio website (linked above) for further information and links.

EDUCATION

2023 - 2027 BS, Computer Science, Class of 2027, Donald Bren School of Information and Computer Sciences,
University of California, Irvine

RELEVANT COURSEWORK

• Project in AI • Intro to AI • Information Retrieval • Data Structures in C++ • Programming in C/C++ • Intro to Software Engineering • Intro to Computer Organization • Linear Algebra • Intro to Probability and Statistics/CS • Intermediate Programming • Discrete Math for CS • Programming Software Libraries • Boolean Algebra and Logic • Intro to Programming

PROFESSIONAL EXPERIENCE

AI Intern at VC Firm

Link Ventures (Summer 2025)

Planned, built, and presented a full-stack MVP for an AI job matching platform and end-to-end career coach that is being funded to be built into a portfolio company, by integrating 11+ features enriched with extensive scraping and RAG LLM AI Agents. Developed with React, TypeScript, Node/Express, and a PostgreSQL database.

DARPA-Funded NLP and Bioinformatics Intern

Gyori Lab at NEU (Summer-Fall 2023)

Enhanced INDRA protein-protein statement generation, improving data extraction in DARPA-funded NLP and bioinformatics research by optimizing NLP prompt engineering techniques in Python.

Clinical Image Analysis Intern

4D Path Inc. (Summer 2021, Summer 2022)

Developed algorithms to diagnose breast cancer microcalcifications and DCIS that contributed to the startup's intellectual property, by applying image processing techniques in MATLAB.

RESEARCH AND PROJECT EXPERIENCE

Blockchain Developer

Blockchain Developer Team at UCI (Fall 2024 - Spring 2025)

Developed a decentralized marketplace dApp that won the ETH Denver 2025 BUILDathon and enabled students to securely sell and rent items as NFTs in order to enhance trust and accessibility within the college community, by integrating smart contracts in Solidity.

Programmer for Video Game Development

VGDC at UCI (Winter 2024 - Current)

Created 3D video games resulting in three finished products showcased to audiences, played by users, and published on itch.io and Steam, by programming in C#, designing UI, and composing audio such as original violin music.

NLP in Classics Researcher

Quantitative Criticism Lab (Summer 2021 - Current)

Mapped semantic associations and diachronic trends in Classics journals and forums to detect and study underlying biases—presenting findings as an invited panelist at CAMWS's 2023 Conference and co-authoring a forthcoming journal paper—by building and analyzing the results of word-embedding models developed in Python, trained and tested on three curated corpora.

LEADERSHIP EXPERIENCE

Vice President of Blockchain at UCI

Blockchain at UCI (Summer 2025 - Current)

Bonding and accelerating UCI's Blockchain community through events, conferences, hackathons, opportunities, and funding from sponsors/partners, by leading, planning, and networking for the organization.

TECHNICAL SKILLS

AI/ML, NLP, RAG LLMs, AI Agents, Blockchain, Smart Contracts, MVP, Prototyping, Full Stack, Web Dev, Game Dev, Design UI/UX, Image Analysis, C/C++, C#, Python, Java, JavaScript, TypeScript, React.js, Node.js/Express, Solidity, MATLAB, R, SQL, CSS, HTML, Assembly

SOFT SKILLS

Research, Pitching, Presenting, PRFAQ + P1 Business Planning, Leadership, Event Planning/Organizing, Teamwork
